

Plastic products will be collected separately from April 2023.

The plastic waste disposal method will change as follows.

Until March 2023

Combustible garbage

Designated yellow garbage bag for combustibles

For condominiums where garbage is collected by private contractors
Colorless or white transparent bag

Plastic products

(plastic trash other than plastic containers and packages)

(Please see the reverse side for examples of plastic products)

Change to

Recyclables

Designated transparent garbage bag for recyclables

For condominiums where garbage is collected by private contractors
Colorless or white transparent bag

Plastic containers and packages

No change

From April 2023

Recyclables

Put **plastic products** in a designated bag **together with plastic containers and packages**

Designated transparent garbage bag for recyclables

Collect on the same day as for plastic containers and packages.

For condominiums where garbage is collected by private contractors

Colorless or white transparent bag
For detailed instructions on garbage disposal, please contact the management company of the condominium.

*The disposal method of PET bottles will not change. Dispose of PET bottles as recyclables on the same collection day as for cans, bottles, and PET bottles.

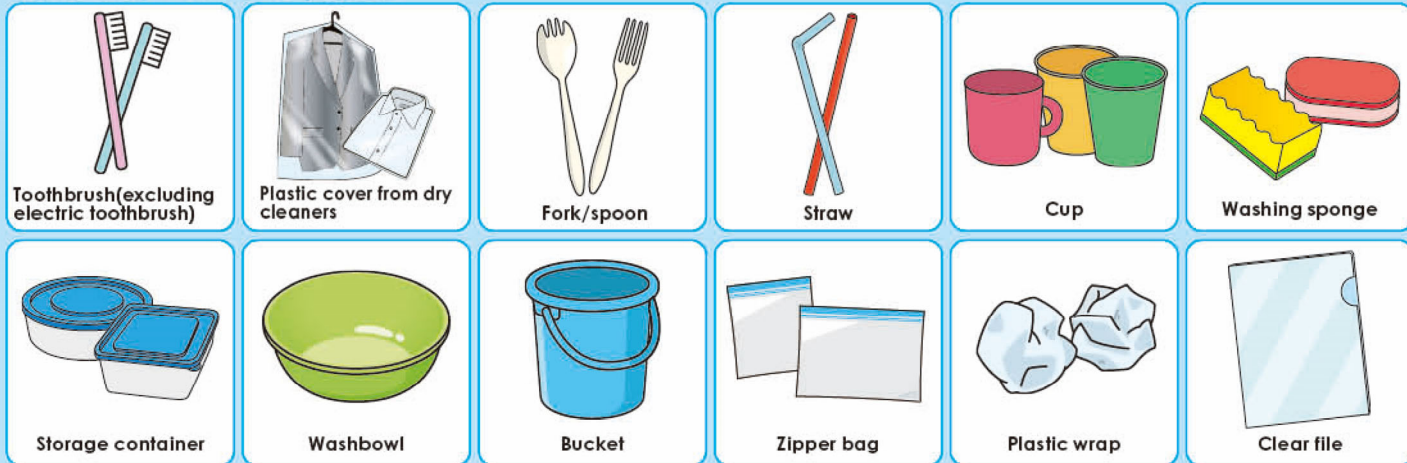

Caution!

Portable electric fans, electronic cigarettes, game consoles, etc.,

DO NOT dispose of items containing lithium batteries as recyclables or combustible garbage, as they may cause fires.

Plastic products to be collected separately as recyclables (Example)

Items made of 100% plastic

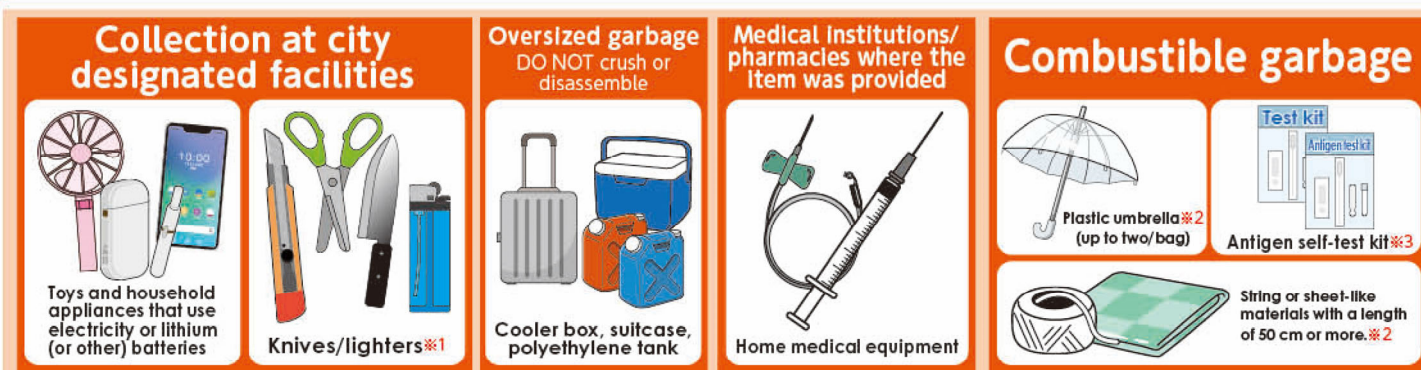

Items made mostly of plastic

- Electric or battery-powered items are collected at city designated facilities. Items with batteries removed are also collected at these facilities.
- Size of trash: a bag containing trash can be tied at the top. (As a reference, the longest part of the trash should be 50 cm or less.)
- Some items are classified as oversized garbage regardless of size (e.g., polyethylene tank, cooler box).
- Remove food stains and dirt by lightly rinsing with water, etc. Items badly soiled should be disposed of as combustible garbage.

Items that cannot be collected separately as plastic products (Example)

※1 Soak the empty cigarette lighter in water to dispose of as combustible garbage ※2 Items that affect recycling facilities ※3 To prevent the spread of infectious diseases
